HOST ONLY

Read this page alone. It explains the game without giving away any answers.

STORY TO READ ALOUD

Read aloud: "The storm closed the mountain road at noon. The keeper of the Snowbound Lodge left before it hit, but every present for tonight's party is locked in the gift vault. The keeper left a trail: eight locks, each opened by the answer to the one before. You have sixty minutes before the fire burns out. Find the vault code."

HOW TO RUN IT

1. Print one full set per team (pages 3 to 13).
2. Cut the hint cards apart; keep them face down.
3. Give each team Puzzle 1, the Lock Sheet and a pencil.
4. Hand out the next puzzle only when a team shows you the right answer.
5. A team may ask for a hint card; each hint adds 2 minutes.
6. First team to the vault code with the best time wins.

PLAYERS	TEAMS	TIME	LEVEL
2 to 20	2 to 5 each	45 to 60 min	Teens + adults

1 · The Keeper's Letter

A note waits on the kitchen table, under a mug of cold cider.

ON THE KITCHEN TABLE

Dear guests,

Snow came early this year, and the road up to the lodge closed by noon.

Hot cider is on the stove, and the fire should last until morning.

I had to leave before the storm, so every gift is locked in the vault.

Find your way in, and the gifts are yours to open tonight.

The window, the card box and the old clock each hold a piece of the way in.

Begin at the frosted window beside the front door.

You will see that the letters there have slipped out of place.

Nothing in this lodge is random, not even this letter.

If you get stuck, your host has hint cards for every room.

Not every clue looks like a clue at first glance.

Enjoy the night, and save me a slice of pie.

The Keeper

What number does the letter give you?

Unlocks Puzzle 2: The Frosted Window

2 · The Frosted Window

Letters are scratched into the frost on the glass.

THE SCENE

Someone wrote a message in the frost, but every letter has slipped forward along the alphabet by the same number of places. Your answer to Puzzle 1 tells you how far. Slide each letter back to read it. The alphabet wraps: one back from A is Z.

Unlocks Puzzle 3: The Card Box

3 · The Card Box

A wooden recipe box with a brass letter grid glued inside the lid.

THE SCENE

The top card is in a keyword cipher. Write your Puzzle 2 keyword under it, over and over. For each pair: find the keyword letter's row in the grid, run along to the card's letter, then look up. The column's top letter is the real one.

Which row of the clock should you read?

Unlocks Puzzle 4: The Grandfather Clock

4 · The Grandfather Clock

The clock face has been swapped for a grid of numbered tiles.

THE SCENE

Fill the grid so every row, every column and every bold 2 x 3 block holds the numbers 1 to 6 once each. Each row has three shaded tiles. Read the shaded tiles in the row your Puzzle 3 answer names, left to right: that three-digit number is a guest room.

Unlocks Puzzle 6: The Ornament Scale

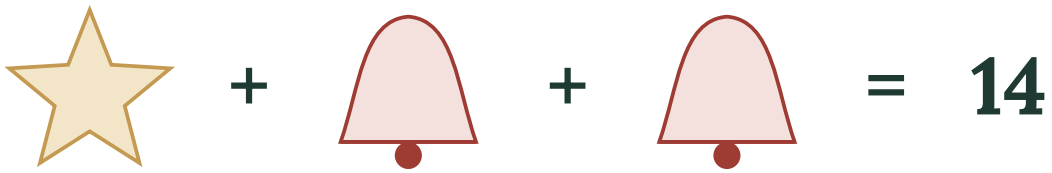

6 · The Ornament Scale

A brass scale on the mantel, with ornaments in place of weights.

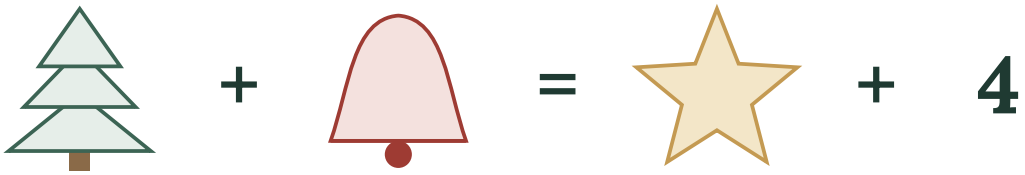

THE SCENE

Each kind of ornament always weighs the same whole number. On its own the scale has too many answers. The keeper's tag says: the star weighs as much as the number of letters in the name you found in Puzzle 5.

Unlocks Puzzle 7: The Storm Telegram

7 · The Storm Telegram

A telegram slip came through before the line went dead. It looks like noise.

THE SCENE

Your Puzzle 6 answer is the step. Start on the very first letter, then count forward that many letters each time, reading across each row and on to the next. Write each letter you land on below. The message tells you how to open the vault.

2. Multiply them. Check: the four digits add up to 18.

Team Timer & Scores

Write the clock time when each team opens a lock. Each hint card adds 2 minutes.

HOW THE FINAL TIME WORKS

Final time = minutes from start to vault + 2 minutes for each hint card used. The lowest final time wins. If no team opens the vault in 60 minutes, the team with the most locks open wins; ties go to fewer hints.

Example: vault opened at 41 min, 3 hint cards used = 41 + 6 = 47 min final time
